

Column 1: Date of YouGov poll together with the web page address and the page number (in brackets)

Columns 2-13: Source Data from YouGov. Columns 2-4 are the weighted sample sizes.

Columns 14-17: GB poll percentages multiplied by the UK+Gib number of people voting leave or remain respectively at the referendum

Columns 18-19: Calculated number of non-voters at the referendum who now express a preference (calculated according to the approach used throughout the website and summarised [here](#) and detailed [here](#))

Columns 20-21: Sum of the expected number of people voting for Remain and Leave assuming they vote according to the preference expressed in the poll.

Column 22: The overall majority, in a referendum, if conducted now, (negative values are a Leave majority, positive values are a Remain majority)

Key: S=Source data from YouGov. r=Remain. L=Leave. dn=don't know. dnv=don't knows - calculated value. So, for example, SL2r% is the source data from YouGov showing the percentage of Leave voters who have changed their minds to remain.
